

SHEIKH MD SALMAN FARSI

Dhaka, Bangladesh

Phone: +880 1986809848 Email: salmanf4545@gmail.com

GitHub: github.com/salmanfarsi01 LinkedIn: linkedin.com/in/salman-farsi4545

Professional Summary

AI Enthusiast specializing in Retrieval-Augmented Generation (RAG), Large Language Models, and intelligent system design. Experienced in building AI-powered recommendation systems, multimodal chatbot platforms, and scalable deployment pipelines using Python, vector databases, FastAPI, and Docker. Strong background in Data Analysis including Exploratory Data Analysis (EDA), SQL, Power BI, and Advanced Excel for transforming raw data into actionable insights. Research-driven mindset with hands-on experience in Explainable AI and real-world AI implementation.

Work Experience

Join Venture AI

July 2025 – Present AI Engineer

- AI Scholarship Recommendation Platform [\[Live\]](#): Engineered a production-ready, cross-lingual RAG recommendation platform using Pinecone, OpenAI GPT models, and deep translator. Processed Swedish scholarship datasets and generated context-aware scholarship recommendations based on candidates' academic profiles, qualifications, and eligibility criteria.
- SensesAI Multimodal RAG Chatbot [\[Live\]](#): Developed an enterprise-grade multimodal AI platform capable of processing PDF, DOCX, image, video, text, and voice inputs. Integrated OpenAI and Pinecone APIs for retrieval and response generation, alongside an ElevenLabs voice agent for real-time voice-to-voice and text-based interactions.
- Local AI Astrology Desktop Application: Developed an installable computer application for generating personalized astrology reports and supporting semantic document retrieval. Built the desktop interface using PyQt6 and integrated a locally deployed Qwen model with BAAI/bge-large-en-v1.5 embeddings, enabling offline AI inference and reducing reliance on external cloud services.
- QLoRA Fine-Tuning of Qwen for Text-to-SQL [\[GitHub\]](#): Fine-tuned the Qwen language model to convert natural-language questions and database schemas into SQL queries. Implemented QLoRA-based parameter-efficient fine-tuning using Unsloth, Hugging Face Transformers, TRL, PEFT, and BitsAndBytes, including dataset formatting, tokenization, training, and model evaluation.
- Wine Quality End-to-End MLOps Pipeline [\[GitHub\]](#): Designed an end-to-end machine-learning pipeline for wine-quality prediction using Python, Pandas, and scikit-learn. Exposed model inference through FastAPI, containerized the application with Docker, configured automated workflows, and implemented production-oriented deployment and monitoring practices.

Research Projects

- VMKLA-UNet: Explainable Hybrid Deep Learning Framework for Credit Risk Prediction (Springer, IC-AISE 2026)
- Bangla Feminism Discourse in Social Media: ML, DL, and Transformer-Based Abusive Comment Detection (IEEE, QPAIN 2026)
- Fusion-Based Hybrid Meta-Learning: Enhancing Cardiovascular disease Prediction with AutoML and Explainable AI (IEEE, QPAIN 2025)
- Next-Generation Retail Intelligence through Vision-Driven Product Recognition and Transaction Automation (Springer, CVSSS2026)

Technical Skills

AI & ML: Machine Learning, Deep Learning, NLP, LLMs, RAG, Fine-Tuning (QLoRA/PEFT), XAI
Programming: Python, SQL

Frameworks & Libraries: PyTorch, TensorFlow, scikit-learn, FastAPI, Django, Flask, PyQt6

Vector DBs & LLM Tooling: Pinecone, Qdrant, pgvector, ChromaDB, FAISS, OpenAI API, Gemini API, DeepSeek, Groq, Hugging Face, Ollama

Deployment & MLOps: Docker, VPS, Git, CI/CD
Data Tools: Power BI, Excel

Education

B.Sc. in Computer Science & Engineering Southeast University CGPA: 3.81	2021 – 2025
---	-------------

Higher Secondary Certificate BAF Shaheen College, Dhaka GPA: 4.33 (A)	2019
---	------

Secondary School Certificate Monipur High School GPA: 5.00 (A+)	2017
---	------

Training & Certifications

- Data Science & Machine Learning with Python & R – Data Solution 360 (2025)
- Data Analyst Job Ready Program – Data Solution 360 (2024)
